## Part I “Classical” Cyto- and Myeloarchitectonic Human Brain Maps

<b>1 The Cytoarchitectonic Map of Korbinian Brodmann: Arealisation and Circuit Specialisation . . . . .</b>	3
Guy N. Elston and Laurence J. Garey	
<b>2 The Cytoarchitectonic Map of Constantin von Economo and Georg N. Koskinas . . . . .</b>	33
Lazaros C. Triarhou	
<b>3 The Myeloarchitectonic Studies on the Human Cerebral Cortex of the Vogt-Vogt School, and Their Significance for the Interpretation of Functional Neuroimaging Data . . . . .</b>	55
Rudolf Nieuwenhuys	

## Part II The Challenge of Mapping Cortical Areas Noninvasively in Living Brains

<b>4 Estimating the Location of Brodmann Areas from Cortical Folding Patterns Using Histology and Ex Vivo MRI . . . . .</b>	129
Bruce Fischl	
<b>5 Database-Driven Identification of Functional Modules in the Cerebral Cortex . . . . .</b>	157
Simon B. Eickhoff and Danilo Bzdok	

## Part III “In Vivo Brodmann Mapping” with High-Field Magnetic Resonance Imaging

<b>6 Where Matters: New Approaches to Brain Analysis . . . . .</b>	179
Robert Turner	
<b>7 MRI Methods for In-Vivo Cortical Parcellation . . . . .</b>	197
Robert Turner	

<b>8 Visualizing Myeloarchitecture In Vivo with Magnetic Resonance Imaging in Common Marmosets (<i>Callithrix jacchus</i>) . . . . .</b>	221
Nicholas A. Bock and Afonso C. Silva	
<b>9 High-Field Magnetic Resonance Mapping of the Border Between Primary Motor (Area 4) and Somatosensory (Area 3a) Cortex in Ex-Vivo and In-Vivo Human Brains . . . . .</b>	239
Stefan Geyer	
<b>Index . . . . .</b>	255
