1	Introduction	1
1.1	miRNA Biogenesis	1
1.2	Biological Functions of miRNAs	2
1.3	Challenges of miRNA Detection	3
1.4	miRNA Detection Methods	4
	References	5
2	miRNA Biology in Pathological Processes	7
2.1	miRNAs in Inherited Diseases	8
2.1.1	Hereditary Deafness Caused by Mutations of miRNA-96 Gene	8
2.1.2	Familial Keratoconus with Cataract Due to Mutations of the miRNA-184 Gene	9
2.1.3	Congenital Malformations Induced by Deletion of the miRNA-17~92 Cluster	9
2.1.4	Other Inherited Diseases Closely Related to miRNA Alterations	10
2.2	miRNAs in Cancer	10
2.2.1	Genetic Changes of miRNAs in Cancer	11
2.2.2	Alterations of miRNAs Expression in Cancer	12
2.3	miRNAs in Cardiovascular Development and Disease	13
2.3.1	miRNAs in Cardiovascular Development	14
2.3.2	miRNAs in Cardiovascular Diseases	15
2.4	miRNAs in Diabetes Mellitus	16
2.4.1	miRNAs Involved in β Cell Development and Function	17
2.4.2	miRNA Alterations During Pre-diabetic Metabolism	17
2.4.3	miRNAs in the Manifestation of Long-Term Complications	18
2.5	Conclusions	19
	References	19

3	Conventional miRNA Detection Strategies	23
3.1	Northern Blotting	23
3.2	Quantitative Real-Time Reverse-Transcription	25
3.3	miRNA Microarrays	29
3.4	Cloning	32
	References	32
4	miRNA Electrochemical Detection	37
4.1	Nanomaterials-Based Electrochemical miRNA Detection	37
4.1.1	Notable Metal Nanoparticles	38
4.1.2	Metal Oxide Nanoparticles	41
4.1.3	Quantum Dots	42
4.1.4	Carbon Nanomaterials	43
4.1.5	Other Nanomaterials	44
4.2	Enzyme-Assisted Electrochemical Signal Amplification	46
4.2.1	Horseradish Peroxidase (HRP)	47
4.2.2	Alkaline Phosphatase (ALP)	47
4.2.3	Other Enzymes or Molecules	49
4.3	Nucleic Acid Strand Amplification Electrochemical miRNA Detection	51
	References	53
5	miRNA Optical Detection	57
5.1	Nanomaterials-Based miRNA Optical Detection	57
5.1.1	Noble Metal Nanoparticles	58
5.1.2	Silver Nanoclusters (AgNCs)	60
5.1.3	Quantum Dots	62
5.1.4	Carbon Nanomaterials	64
5.1.5	Transition Metal Dichalcogenides and Carbon Nitride Nanosheet	65
5.1.6	Other Nanomaterials	66
5.2	Target or Probe Amplification-Based miRNA Optical Detection	67
5.2.1	LCR	67
5.2.2	RT-PCR	68
5.2.3	RCA	69
5.2.4	LAMP	70
5.2.5	EXPAR	71
5.3	Probe Design Strategy Techniques in miRNA Optical Detection	72
	References	73
6	Other Emerging miRNA Detection Strategies	77
6.1	Surface Plasmon Resonance (SPR)	77
6.2	Microfluidic Technique	80

6.3	Next-Generation Sequencing	82
6.4	ICP-MS.	83
	References	84
7	Intracellular and Organic miRNA In Situ Detection.	87
7.1	Functional Nanoprobe-Based Intracellular miRNA Detection	88
7.2	miRNA Imaging Analysis	91
7.3	In Situ Hybridization (ISH)	94
