1	Acute Trauma and Overuse Injuries: Essentials	2
1.1	Normal Skeletal Development, Variations, and Transitions to Pathologic Conditions (W. Michl)	2
1.1.1	Normal Skeletal Development	2
1.1.2	Variations and Disturbances of Skeletal Development	3
1.1.3	Transitions to Pathologic States	4
1.2	Fractures: Definition, Types, and Classifications (K. Bohndorf)	4
1.2.1	Definition and Classification	4
1.2.2	Fracture Types	6
1.2.3	Classifications	6
1.3	Fractures in Children (W. Michl)	8
1.3.1	Special Features of Fractures in Children	8
1.3.2	Battered-Child Syndrome	10
1.4	Fractures of the Articular Surfaces: Subchondral, Chondral, and Osteochondral Fractures (K. Bohndorf, S. Trattng)	12
1.4.1	Subchondral Fracture	14
1.4.2	Chondral Fracture	14
1.4.3	Osteochondral Fracture	14
1.5	Stress and Insufficiency Fractures (K. Bohndorf)	16
1.5.1	Classification	16
1.5.2	Insufficiency Fractures and Destructive Arthropathy	20
1.5.3	Pathologic Fractures	20
1.5.4	Transient Osteoporosis and Transient Bone Marrow Edema	22
1.6	Fracture Healing	24
1.6.1	Primary Fracture Healing (Direct Cortical Reconstruction) (K. Bohndorf)	24
1.6.2	Secondary Fracture Healing (Fracture Healing by Callus Formation) (K. Bohndorf)	24
1.6.3	Radiological Assessment after Fracture Fixation of the Peripheral Skeleton (E. Knoepfle)	26
1.6.4	Radiological Assessment after Implantation of a Joint Prosthesis in the Peripheral Skeleton (E. Knoepfle)	32
1.7	Complications after Fractures	36
1.7.1	Delayed Union, Nonunion, and Posttraumatic Bone Cyst Formation (K. Bohndorf)	36
1.7.2	Posttraumatic Disturbances of Growth in Children and Adolescents (W. Michl)	40
1.7.3	Disuse Osteoporosis (K. Bohndorf)	40
1.7.4	Complex Regional Pain Syndrome (K. Bohndorf)	40
1.7.5	Posttraumatic Osteoarthritis (K. Bohndorf)	42
1.8	Traumatic and Overuse Injuries to Muscles, Tendons, and Tendon Insertions (K. Bohndorf, A. Seifarth)	44
1.8.1	Muscles	44
1.8.2	Tendons	44
1.8.3	Tendon Insertions (Enthesopathy)	48
1.9	Practical Advice on Diagnostic Radiography in Traumatology (K. Bohndorf)	52
1.9.1	Report of Findings	52
1.9.2	Follow-Up Reviews	53
1.9.3	What to Avoid	53
2	Acute Trauma and Chronic Overuse (According to Region)	54
2.1	Cranial Vault, Facial Bones, and Skull Base (H. Imhof, N. Jorden)	54
2.1.1	Fractures of the Cranial Vault	54
2.1.2	Basilar Skull Fractures	54
2.1.3	Fractures of the Petrous Bone	55
2.1.4	Facial Bone Fractures	56
2.2	Spine	59
2.2.1	Anatomy, Variants, Technique, and Indications (T. Grieser)	59
2.2.2	Mechanisms of Injury and Classifications (T. Grieser)	60
2.2.3	Special Traumatology of the Cervical Spine and the Craniocervical Junction (T. Grieser)	70
2.2.4	Injury Patterns of the "Stiff" Spine (T. Grieser)	74
2.2.5	Stable or Unstable Fracture? (T. Grieser)	76
2.2.6	Fresh or Old Fracture? (T. Grieser)	77
2.2.7	Differential Diagnosis "Osteoporotic Versus Pathologic Fracture" (T. Grieser)	78

2.2.8	Stress Phenomena in the Spine: Stress Reaction and Stress Fracture (Spondylolysis) of the Neural Arches (<i>T. Grieser</i>)	78	2.8.2	Radial Head and Neck Fractures	136
2.2.9	Value of MRI in Acute Trauma (<i>T. Grieser</i>)	78	2.8.3	Shaft Fractures of the Forearm	138
2.2.10	Radiological Assessment after Surgery of the Spine (<i>R. Fessler</i>)	82	2.8.4	Distal Forearm Fractures	140
2.3	Pelvis	86	2.8.5	Instability of the Distal Radioulnar Joint	144
2.3.1	Fractures of the Pelvic Ring (<i>E. J. Mayr</i>)	86	2.8.6	Ulnar Impingement Syndrome	145
2.3.2	Acetabular Fractures (<i>E. J. Mayr</i>)	88	2.8.7	Radiological Assessment after Surgery of the Forearm (<i>E. Knoepfle</i>)	146
2.3.3	Fatigue Fractures of the Pelvis (<i>E. J. Mayr</i>)	91	2.9	The Wrist (<i>J. Zentner</i>)	147
2.3.4	Hip Dislocation/Fracture Dislocations of the Hip (<i>E. J. Mayr</i>)	92	2.9.1	Anatomy, Variants, Technique, and Indications	147
2.3.5	Pubalgia (Osteitis Pubis) (<i>K. Bohndorf</i>)	92	2.9.2	Fractures and Dislocations and Their Complications	148
2.4	Shoulder Joint (<i>K. Woertler</i>)	94	2.9.3	Carpal Instabilities and Malalignments	152
2.4.1	Anatomy, Variants, and Technique	94	2.9.4	Triangular Fibrocartilage Complex	156
2.4.2	Impingement	96	2.9.5	Ulnocarpal Impaction Syndrome	158
2.4.3	Rotator Cuff Pathology and Biceps Tendinopathy	98	2.9.6	Tendons of the Wrist	158
2.4.4	Pathology of the Rotator Interval	102	2.10	Metacarpals and Fingers (<i>J. Zentner</i>)	160
2.4.5	Shoulder Instability	104	2.10.1	Anatomy, Technique, and Indications	160
2.4.6	Other Labral Pathology	110	2.10.2	Fractures	160
2.4.7	Postoperative Complications	112	2.10.3	Tendon and Ligament Lesions	160
2.5	Shoulder Girdle and Thoracic Wall (<i>N. Jorden</i>)	116	2.11	Hip Joint	164
2.5.1	Sternoclavicular Dislocation	116	2.11.1	Anatomy, Variants, and Techniques (<i>C. W. A. Pfirrmann, R. Sutter</i>)	164
2.5.2	Clavicular Fracture	116	2.11.2	Fractures (<i>C. W. A. Pfirrmann, R. Sutter</i>)	166
2.5.3	Acromioclavicular Dislocation	116	2.11.3	Femoroacetabular Impingement (<i>C. W. A. Pfirrmann, R. Sutter</i>)	166
2.5.4	Scapular Fracture	118	2.11.4	Labral Lesions (<i>C. W. A. Pfirrmann, R. Sutter</i>)	168
2.5.5	Sternal and Rib Fractures	118	2.11.5	Chondromalacia and Synovitis (<i>C. W. A. Pfirrmann, R. Sutter</i>)	168
2.5.6	Stress Phenomena of the Acromioclavicular Joint	118	2.11.6	Muscle and Tendon Injuries (<i>C. W. A. Pfirrmann, R. Sutter</i>)	170
2.5.7	Posttraumatic Conditions Secondary to Injuries of the Shoulder Girdle	118	2.11.7	Slipped Capital Femoral Epiphysis (<i>C. W. A. Pfirrmann, R. Sutter</i>)	172
2.6	Upper Arm	120	2.11.8	Radiological Assessment after Fracture Fixation and Joint Replacement of the Hip (<i>W. Michl</i>)	172
2.6.1	Proximal Humeral Fractures (<i>N. Jorden</i>)	120	2.12	Femur and Soft Tissues of the Thigh	174
2.6.2	Humeral Shaft Fractures (<i>N. Jorden</i>)	120	2.12.1	Anatomy and Technique (<i>O. Ertl</i>)	174
2.6.3	Distal Humeral Fractures (<i>N. Jorden</i>)	122	2.12.2	Fractures (<i>O. Ertl</i>)	174
2.6.4	Radiological Assessment after Surgery of the Upper Arm (<i>E. Knoepfle</i>)	124	2.12.3	Muscle Injuries of the Thigh (<i>O. Ertl</i>)	177
2.7	Elbow Joint (<i>E. McNally, O. Ertl, K. Bohndorf</i>)	126	2.12.4	Radiological Assessment after Surgery of the Thigh (<i>E. Knoepfle</i>)	178
2.7.1	Medial Compartment	126	2.13	Knee Joint	180
2.7.2	Lateral Compartment	126	2.13.1	Indications and Technique (<i>S. Trattnig, K. M. Friedrich, K. Bohndorf</i>)	180
2.7.3	Anterior Compartment	130	2.13.2	Cruciate Ligaments (<i>S. Trattnig, K. M. Friedrich, K. Bohndorf</i>)	180
2.7.4	Posterior Compartment	130	2.13.3	Medial Supporting Structures (<i>S. Trattnig, K. M. Friedrich, K. Bohndorf</i>)	184
2.7.5	Osteochondral Lesions: Traumatic Lesions, Panner's Disease, and Osteochondritis Dissecans	132	2.13.4	Lateral Supporting Structures (<i>S. Trattnig, K. M. Friedrich, K. Bohndorf</i>)	186
2.7.6	Neuropathies	134			
2.8	Forearm (<i>A. Altenburger</i>)	136			
2.8.1	Proximal Fractures of the Forearm	136			

2.13.5	Patella, Quadriceps Muscle, and Anterior Ligaments (S. Trattnig, K. M. Friedrich, K. Bohndorf)	186	2.15.1	Anatomy, Variants, and Technique (E.-M. Wagner, W. Fischer, F. Sauerwald, N. Jorden) . .	204
2.13.6	Menisci (S. Trattnig, K. M. Friedrich, K. Bohndorf)	188	2.15.2	Fractures of the (True) Ankle Joint (E.-M. Wagner)	206
2.13.7	Cartilage (S. Trattnig, K. M. Friedrich, K. Bohndorf)	194	2.15.3	Osteochondral Lesions of the Talus (K. Bohndorf)	206
2.13.8	Bursae and Plicae (S. Trattnig, K. M. Friedrich, K. Bohndorf)	194	2.15.4	Fractures of the Talus and Calcaneus (E.-M. Wagner, F. Sauerwald)	208
2.13.9	Findings after Cartilage Replacement Therapy (S. Trattnig, K. M. Friedrich, K. Bohndorf)	194	2.15.5	Fractures and Dislocations of the Tarsal Bones (F. Sauerwald)	212
2.13.10	Radiological Assessment of Knee Replacement Surgery (E. Knoepfle)	196	2.15.6	Fractures and Dislocations of the Forefoot (F. Sauerwald)	214
2.14	Lower Leg	197	2.15.7	Radiological Assessment after Surgery of the Ankle and Foot (N. Jorden)	216
2.14.1	Fractures (E.-M. Wagner)	197	2.15.8	Acquired Malalignments (N. Jorden)	216
2.14.2	Radiological Assessment of Surgery of the Lower Leg (E. Knoepfle)	200	2.15.9	Ligaments (W. Fischer)	218
2.14.3	Soft Tissue Injuries and Stress Reactions of the Lower Leg (K. Bohndorf)	202	2.15.10	Tendons (W. Fischer, S. Seifarth)	222
2.15	Ankle Joint and Foot	204	2.15.11	Impingement Syndromes (W. Fischer)	224
			2.15.12	Tarsal Tunnel Syndrome (W. Fischer)	226
			2.15.13	Sinus Tarsi (W. Fischer)	226
			2.15.14	Plantar Fascia (W. Fischer)	226
			2.15.15	Plantar Plate and Turf Toe (W. Fischer)	226
			2.15.16	Morton's Neuroma (W. Fischer)	226
3	Infections of the Bones, Joints, and Soft tissues	228			
3.1	Osteomyelitis and Osteitis	228	3.2	Soft Tissue Infections (T. Grieser)	246
3.1.1	Terminology, Classification, and Infection Routes (K. Bohndorf, A. P. Erler, R. Braunschweig)	228	3.2.1	Necrotizing Fasciitis	248
3.1.2	Hematogenous Osteomyelitis (K. Bohndorf, A. P. Erler, R. Braunschweig)	229	3.3	Septic Arthritis (K. Bohndorf)	250
3.1.3	Chronic Exogenous Osteomyelitis (K. Bohndorf, A. P. Erler, R. Braunschweig)	234	3.3.1	Nonspecific Pathogens	250
3.1.4	Forms of Osteomyelitis (Specific Pathogens) (K. Bohndorf)	238	3.3.2	Tuberculous Arthritis	252
3.1.5	Infections of the Spine (K. Bohndorf)	242	3.4	Musculoskeletal Inflammations associated with HIV Infections (K. Bohndorf)	252
4	Tumors and Tumorlike Lesions of Bone, Joints, and the Soft Tissues	256			
4.1	General Aspects of Diagnostic Imaging of Skeletal Tumors (B. Jobke, K. Bohndorf)	256	4.2.1	Osteogenic Tumors	266
4.1.1	The Role of the Radiologist in Assessing a Suspected Bone Tumor	256	4.2.2	Chondrogenic Tumors	274
4.1.2	General Approach to a Suspected Bone Tumor	257	4.2.3	Connective Tissue and Fibrohistiocytic Tumors	282
4.1.3	Description of a Focal Bone Lesion	258	4.2.4	Ewing's Sarcoma and Primitive Neuroectodermal Tumor	284
4.1.4	Assessment of the Aggressiveness of a Bone Lesion: Growth Rate	262	4.2.5	Giant Cell Tumor	286
4.1.5	Staging of Bone Tumors	264	4.2.6	Vascular Tumors	288
4.1.6	Imaging Modalities for Tissue Diagnosis, Assessment of Biological Activity and Staging of Bone Tumors	264	4.2.7	Lipogenic Tumors	288
4.2	Primary Bone Tumors (B. Jobke, K. Bohndorf)	266	4.2.8	Miscellaneous Tumors	288
			4.3	Tumorlike Lesions	291
			4.3.1	Osteoma, Bone Islands, and Osteopoikilosis (K. Bohndorf, H. Rosenthal)	291
			4.3.2	Fibrous Cortical Defect and Nonossifying Fibroma (K. Bohndorf, H. Rosenthal)	292

4.3.3	Simple (Juvenile) Bone Cyst (K. Bohndorf, H. Rosenthal)	294	4.5.2	Clinically Important Soft Tissue Tumors, also Partially Amenable to Classification Using Imaging Procedures (B. Jobke, K. Bohndorf)	312
4.3.4	Aneurysmal Bone Cyst (K. Bohndorf, H. Rosenthal)	294	4.5.3	Follow-up Reviews and Diagnostics for Recurrences of Soft Tissue Tumors (B. Jobke, K. Bohndorf)	316
4.3.5	Langerhans Cell Histiocytosis (K. Bohndorf, H. Rosenthal)	296	4.5.4	Vascular Malformations (W. A. Wohlgemuth) .	318
4.3.6	Fibrous Dysplasia (K. Bohndorf, H. Rosenthal)	298			
4.3.7	Vascular Malformations of the Bone (so-called Hemangioma) (W. A. Wohlgemuth, K. Bohndorf)	300	4.6	Intra-articular Tumors and Tumorlike Lesions	320
4.3.8	Less Common Tumorlike Lesions (K. Bohndorf, H. Rosenthal)	304	4.6.1	Loose Joint Bodies (K. Bohndorf)	320
4.4	Metastases (K. Bohndorf)	306	4.6.2	Synovial Chondromatosis (K. Bohndorf)	322
4.4.1	Monitoring	308	4.6.3	Ganglion and Synovial Cyst (M. Gebhard)	322
4.5	Soft tissue Tumors	310	4.6.4	Lipoma Arborescens (K. Bohndorf)	326
4.5.1	Introduction (B. Jobke, K. Bohndorf)	310	4.6.5	Pigmented Villonodular Synovitis/ Giant Cell Tumor of the Tendon Sheath (K. Bohndorf)	326
5	Bone Marrow	328			
5.1	Normal Bone Marrow (I. M. Noebauer-Huhmann)	328	5.3.4	Fat Accumulation Secondary to Osteoporosis	332
5.1.1	Distribution and Age-dependent Physiological Conversion of Red to Yellow Marrow	328	5.4	Chronic Myeloproliferative Diseases (I. M. Noebauer-Huhmann)	332
5.1.2	Reconversion of Yellow to Red Marrow/ Bone Marrow Hyperplasia	328	5.4.1	Myelodysplastic Syndrome (Also Known as Preleukemia)	332
5.2	Anemias and Hemoglobinopathies (I. M. Noebauer-Huhmann)	330	5.4.2	Polycythemia Vera	332
5.2.1	Anemias	330	5.4.3	Myelofibrosis/Osteomyelofibrosis	332
5.2.2	Hemoglobinopathies (Thalassemia, Sickle Cell Anemia)	330	5.4.4	Essential Thrombocythemia	332
5.3	Metabolic Bone Marrow Alterations (I. M. Noebauer-Huhmann)	330	5.4.5	Systemic Mastocytosis	332
5.3.1	Hemosiderosis and Hemochromatosis	330	5.5	Malignant Disorders of the Bone Marrow (I. M. Noebauer-Huhmann)	334
5.3.2	Lipidoses and Lysosomal Storage Diseases ..	330	5.5.1	Multiple Myeloma/Solitary Plasmacytoma ..	334
5.3.3	Serous Atrophy	332	5.5.2	Lymphoma	336
			5.5.3	Leukemia	338
5.6	Therapy-related Bone Marrow Alterations (I. M. Noebauer-Huhmann)	338			
6	Osteonecroses of the Skeletal System	340			
6.1	Anatomy, Etiology, and Pathogenesis (K. Bohndorf, R. Whitehouse)	340	6.3.2	Osteonecrosis of the Lunate	350
6.2	Bone Infarction (R. Whitehouse, K. Bohndorf)	341	6.3.3	Osteonecrosis of the Scaphoid	350
6.3	Osteonecrosis (R. Whitehouse, K. Bohndorf)	344	6.3.4	Osteonecrosis of the Vertebrae	350
6.3.1	Osteonecrosis of the Femoral Head	344	6.4	Sequelae of Radiotherapy (B. Jobke)	352
			6.5	Pseudo-osteonecroses (K. Bohndorf, R. Whitehouse)	354

7	Osteochondroses	356
7.1	Anatomy, Etiology, and Pathogenesis (K. Bohndorf)	356
7.1.1	What Do the Different Forms of Osteochondrosis Have in Common?	356
7.1.2	To Which Disorders is the Term "Osteochondrosis" Not Applicable?	357
7.2	Articular Osteochondroses	357
7.2.1	Perthes' Disease (W. Michl, K. Bohndorf)	357
7.2.2	Freiberg's Disease (Osteochondrosis of the Metatarsal Heads) (K. Bohndorf)	362
7.2.3	Köhler's Disease Type I (K. Bohndorf)	362
7.2.4	Panner's Disease and Hegemann's Disease (K. Bohndorf)	362
7.2.5	Osteochondritis Dissecans (K. Bohndorf)	364
7.3	Nonarticular (Apophyseal) Osteochondroses (K. Bohndorf)	366
7.3.1	What do Apophyseal Osteochondroses Have in Common?	366
7.3.2	Osgood–Schlatter Disease	368
7.3.3	Sinding–Larsen–Johansson Disease	368
7.3.4	Sever's Disease	368
7.3.5	"Little Leaguer's Elbow"	368
7.4	Physeal Osteochondroses (W. Michl)	368
7.4.1	Scheuermann's Disease	368
7.4.2	Blount's Disease	370
8	Metabolic, Hormonal, and Toxic Bone Disorders	372
8.1	Osteoporosis (T. Grieser)	372
8.1.1	Classification and Clinical Presentation of Osteoporosis	372
8.1.2	Bone Density Testing	373
8.1.3	Radiographic Findings in Osteoporosis	374
8.2	Rickets and Osteomalacia (B. Jobke)	376
8.3	Hyperparathyroidism and Hypoparathyroidism (B. Jobke)	378
8.3.1	Hyperparathyroidism	378
8.3.2	Hypoparathyroidism	380
8.4	Renal Osteodystrophy (B. Jobke)	380
8.5	Drug-induced Changes to the Bone (B. Jobke)	380
8.5.1	Corticosteroids	380
8.5.2	Other Drugs	382
8.6	Amyloidosis (B. Jobke)	382
8.7	Other Osteopathic Diseases (K. Bohndorf)	382
8.7.1	Hemophilic Arthropathy	382
8.7.2	Acromegaly	384
9	Congenital Disorders of Bone and Joint Development	386
9.1	Bone Age Assessment in Growth Disorders (W. Michl)	386
9.2	Congenital Dysplasia of the Hip (W. Michl)	386
9.3	Congenital Deformities of the Foot (W. Michl)	388
9.4	Patellofemoral Dysplasia (J. Zentner)	390
9.5	Scoliosis and Kyphosis (W. Michl)	390
9.5.1	Kyphosis	390
9.5.2	Scoliosis	391
9.6	Congenital Disorders of Skeletal Development (W. Michl)	391
9.6.1	Diagnostic Pathway for Classification of Skeletal Dysplasia	392
9.6.2	The Most Common Neonatal Skeletal Dysplasias	396
